

## Senior Front End Developer (Web)

### The role

We're looking for an experienced, skilled, and communicative developer. This key role is an active member of the team who takes ownership for designing UI/UX.

### Requirements

- Smart and get job done.
- 3+ years designing and developing intuitive, real-time web applications.
- Translating user requests to live applications.
- Ability to discern between what users want, and what they need.
- Full-stack, production-level programming skills
- Have UX design sensibility.
- HTML, CSS and JavaScript (including JQuery and related libraries).
- Experience with Git, feature branching, and SCRUM development.
- Excellent written and verbal communication skills.

### Highly Desirable

- Prior startup/small company experience.
